MBGS MEMBERS HELP TO CELEBRATE EARTH DAY

On April 24th, MBGS continued its tradition of participating in the State of Michigan's Earth Day celebration, which took place at Constitution Hall in Lansing. This year, MBGS shared a booth with the Michigan Geological Survey, the Department of Natural Resources, and the Department of Environment, Great Lakes, & Energy (EGLE, formerly DEQ). MBGS et al. were stationed outside in the tent again, but we had nice weather this year. The Michigan Geological Repository for Research and Education (MGRRE) were inside with their Core Kids booth. Outside volunteers included Adam Wygant (MBGS/EGLE), Peter Rose (MBGS/DNR), Bob Reszka (MBGS), George Davis (MBGS/Detroit Salt), Jennifer Trout (MBGS/MGRRE), and Kevin Nguyen (MBGS/WMU). Peter Voice of Western Michigan University and MGRRE manned the Core Kids booth.

The event was a great success again. The teams demonstrated porosity and permeability as well as handed out samples of rocks and minerals including halite (generously donated by Detroit Salt), feldspar, coal, specular hematite, taconite pellets, native copper flakes, pieces of agate, and Petoskey stones. We were scraping the bottom of the barrel and, in fact, ran out of most of our samples by 2:00 pm, except for halite, thanks to George! Bob Reszka was working hard throughout the day breaking up larger rock and mineral samples into smaller pieces to last us until the crowds dwindled. We tried our best to spark a greater interest in Earth science among the children and hope that some took away a greater appreciation of the natural world around them.

A special thanks goes to John Esch for supplying donuts to keep the volunteers sustained for the long day on our feet.

MBGS ANNOUNCES 2019 SCHOLARSHIP RECIPIENT

Michigan Basin Geological Society wants to thank all those students who submitted applications for our 2019 scholarship. MBGS is pleased to announce, Ayu Nurhidayati was selected as the 2019 recipient of a \$500 scholarship. Ayu Nurhidayati is a graduate student at Western Michigan University, Department of Geological and Environmental Sciences. She is conducting her research under the direction of Dr. Peter Voice, detailed hand and thin section assessment to establish a depositional model for the Amhurstberg and Richfield Members of the Lucas formation in Southeast Michigan. Ayu will be completing her MS in 2019 and plans to return to the Indonesian Institute of Sciences where she works as a Geological Researcher. Ayu attended WMU as a graduate researcher in an exchange program to further her training in geology. MBGS appreciates all who applied and wish Ayu continued success when she returns to Indonesia.
